**SUBJECT: Sumitomo Metal Mining Pogo LLC (Pogo) Unit 412 CISWI
Test Plan under Pogo's Air Quality Control Minor Permit
No. AQ0405MSS06.**

Dear Ms. Valdez:

Sumitomo Metal Mining Pogo LLC (Pogo) plans to conduct additional source testing to measure emissions of regulated pollutants from its new solid waste incinerator. The source testing effort is scheduled to begin July 20, 2014.

The incinerator is currently permitted as emission unit number 412 under Pogo's Air Quality Control Minor Permit No. AQ0406MSS06. It recently became subject to emission standards in 40 CFR 60, Subpart CCCC, published by EPA in February 2013 as part of the final Commercial and Industrial Solid Waste Incinerator (CISWI) Rules. The source test program will be conducted according to the methods and procedures specified in Table 8 of Subpart CCCC to demonstrate compliance with the applicable emission standards after installing new pollution controls for SO₂. The Test Plan was submitted to the Alaska Department of Conservation and is available upon request.

If you have any questions, please give me a call at (907) 895-2879 or email me at sally.mcleod@smmpogo.com.

Sincerely,

Sally S. McLeod, CEM, REM
Environmental Manager
